THE BULLOCK PRESIDENCY

Series Bible — Document 05: The Presidential Agenda & School Timeline (LOCKED CANON)

1. First-Term Agenda (Locked)

Locked: the President achieves **100% astronomical success** on every first-term goal. The drama is in *how* he does it: the fights, the deals, the rule-bending, and what each victory costs. His opponents fight every step at full strength and are never nerfed. He wins anyway.

#	Goal	Story notes (fights to dramatize)
1	**Universal Healthcare**	The insurance industry, cost scoring, and the Senate filibuster are the obstacles.
2	**Universal Education**	Pre-K through college. Teachers' unions, states' rights, and student debt fights.
3	**100% elimination of the national debt**	Debt was about **$31.4 trillion** in Jan 2023 (it hit the ceiling Jan 19, 2023). The payoff is a headline moment: "THE DEBT IS ZERO."
4	**World peace**	Summits, back channels, and deals with real leaders. The adversaries play the long game (seeding the 2032 war in Bible 02).
5	**Domestic peace**	Crime, political violence, police reform, and healing a divided country.
6	**100% elimination of inflation**	Inflation was about 6.5% year over year in Dec 2022, so he inherits a real problem. Works with the Federal Reserve (Chair Jerome Powell) without compromising its independence.
7	**Making everything 100% astronomically affordable again**	Housing, groceries, gas, childcare, insulin, and rent.
8	**Making the USA a dominant superpower once again**	Military, economic, technological, and cultural.
9	**Astronomically lowering taxes, eventually to 100% elimination**	"There are better ways for the country to make money": national revenue sources replace taxes. The Sixteenth Amendment (the federal income tax) becomes a target.
10	**Make the country 100% clean in every way**	Clean energy, air, water, streets, and government (ethics and anti-corruption).
11	**Immigration 100% legal and allowed: open borders, all the way**	The most explosive fight of the first term. Huge opposition from Republicans and some Democrats, governors such as Texas's Greg Abbott, and the cable news wars. It ties directly into the North American Union.

More goals will be added as the story unfolds.

2. The Long-Term Goal: The North American Union

- **What it is:** a political and economic union of North America, at minimum the United States, Canada, and Mexico. Scope (Central America? the Caribbean?) is for the author to set.
- **When:** it **starts in the first term** and becomes the **main focus of the second term**, if he is reelected.
- **Real-world grounding:** the USMCA trade agreement (in force since July 1, 2020) is the starting platform. Leaders in 2023: Canada's Justin Trudeau (b. Dec 25, 1971; 51) and Mexico's Andrés Manuel López Obrador (b. Nov 13, 1953; 69). Mexico's next president takes office Oct 1, 2024.
- **Internet realism:** "North American Union" (and the mythical "Amero" currency) has been a conspiracy theory since the mid-2000s. When Marc proposes the real thing, the internet melts down: "THEY TOLD US IT WAS A CONSPIRACY THEORY."
- **Not nerfed:** sovereignty hawks, Canadian and Mexican nationalists, and Congress all resist hard. The war in 2032 will test the Union to its limit.

LOCKED: The Age Question & the 28th Amendment

Canon (Option B, as revised by the author): every birthday stays exactly as written. Marc-Anthony is **31** when he announces on April 20, 2023, and **33** on Inauguration Day. His position: **age shouldn't matter. Competence, intelligence, and capability should.** The minimum age requirement made sense for its time, but this is the 21st century, and he's not in his 20s. He turns the outdated rule into a national cause, which makes it the signature "Marc Move": bending an outdated rule by changing it.

Marc's Argument

- *"The Founders wrote 35 in 1787, when life expectancy at birth was under 40 and a 30-year-old had never left his county. I have run a company bigger than most countries, and I've been working since I was 10. Judge me on what I can do, not my birthday."*
- Parity: you can serve in the House at 25 and the Senate at 30, vote and go to war at 18, but you can't be President until 35.
- History: the Constitution has been updated for its time before. The 26th Amendment lowered the voting age to 18 in 1971, and the states ratified it in about 100 days.

The Opposition (Not Nerfed)

- **Originalists and constitutional conservatives:** "You don't rewrite the Constitution for one celebrity."
- **Rival campaigns** (Biden's re-election team, Trump, DeSantis, Haley, Ramaswamy, RFK Jr.) each attack it from their own angle. Ramaswamy (37) and Haley face awkward questions of their own about age and generational change.
- **Secretaries of state** in several states refuse to put an underage candidate on the ballot. (Real precedent: in 2012, 27-year-old candidate Peta Lindsay was kept off ballots in several states.) There are court fights in multiple states.
- **Cornelius Smilley's dilemma:** the amendment would also clear the way for Esther (30) to run sooner, which is his dream, but it hands the White House to Marc. Does he fight it or quietly support it?

Locked Timeline

Date	Event
Thu Apr 20, 2023	Marc announces. Within minutes, the headline everywhere is **"HE'S 31."** #TooYoung and #AgeIsJustANumber trend side by side.
Spring 2023 – 2024	Ballot-access lawsuits. Marc launches the national campaign to change the rule.
Summer 2024	**Running-mate insurance:** Marc wants Amond (32), but if the amendment fails, both would be ineligible. He picks a running mate aged 35 or older (author creates), so that under Section 3 of the 20th Amendment the Vice President-elect could act as President until Marc turns 35. Amond accepts a promise: the 2028 ticket.
Mon Jul 1, 2024	Congress passes the **28th Amendment** by the required two-thirds of both chambers, on the 53rd anniversary of the 26th Amendment's ratification. It's a bipartisan coalition, and the single biggest proof of Marc's bipartisanship.
Jul – Dec 2024	The ratification race. Governors call special legislative sessions, and every state vote is a story.
Tue Nov 5, 2024	Election Day. Marc wins the presidency while ratification is still incomplete. Is the President-elect eligible? The country holds its breath.
Tue Dec 17, 2024	The 38th state ratifies on the **same day the Electoral College meets**. The Archivist certifies the amendment soon after (169 days from passage).
Mon Jan 6, 2025	Congress counts the electoral votes.

Date	Event
Mon Jan 20, 2025	Marc-Anthony Bullock is sworn in as the **47th President** at age **33**, the **youngest President in American history** (Theodore Roosevelt was 42; JFK, 43, was the youngest elected). He serves the full first term, Jan 20, 2025 to Jan 20, 2029.

The 28th Amendment: Proposed Text (author may revise)

Section 1. No person shall be eligible to the Office of President or Vice President who shall not have attained to the Age of twenty-five Years; the requirement of thirty-five Years in Article II, Section 1, Clause 5 is hereby repealed.

Section 2. This article shall take effect upon its ratification.

Marc campaigned to remove the age requirement entirely. The final text is the bipartisan compromise: a floor of **25, matching the House**. (The author can make it a full repeal instead.)

- **Continuity payoff:** the 28th Amendment becomes the precedent for the 2032 wartime amendment suspending the 22nd. That one would be the **29th Amendment**. Supporters say "We did it before." Opponents say "This is how it starts: he's rewritten the Constitution twice."
- Amond turns 35 on Feb 10, 2027, though the 28th Amendment already makes him eligible. He joins the ticket for the 2028 re-election, as promised.

3. School Timeline (Locked)

The story opens during the **2022–2023 school year**. School years run from late August or September to May or June. **Emma and Victoria** (born May 10, 2012) are in 5th grade, and **Lyric** (born April 20, 2014) is in 3rd grade.
